ABOUT US

GLOBAL WAREHOUSE RACKING MANUFACTURER SINCE 2008

With efficient technical support and a sound cooperation model, our business has achieved a global presence and successfully implemented numerous overseas integration projects.

- 20,000 m² intelligent manufacturing factory
- International quality standard and customized manufacturing
- ISO9001; CE; FEM10.2.02; AS4084 certification
- Professional packaging ensures transportation safety
- Ability of global project implementation

SELECTIVE PALLET RACKING

Smart Storage. Easy Access. Maximum Efficiency.

HIGH ACCESSIBILITY
Direct access to every pallet improves picking efficiency.

STRONG & RELIABLE
High-quality steel construction ensures safety and durability.

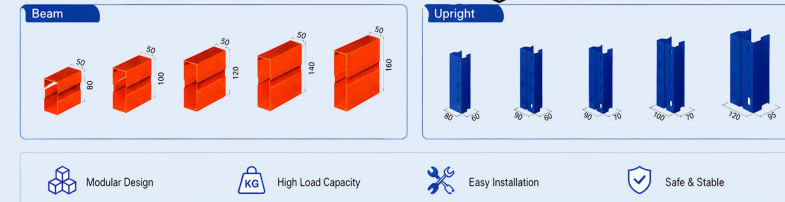

FLEXIBLE CONFIGURATION
Adjustable beam levels to accommodate various loads.

COST-EFFECTIVE
Simple structure for lower investment and maintenance.

Efficient · Accessible · Versatile

DETAILS & COMPONENTS

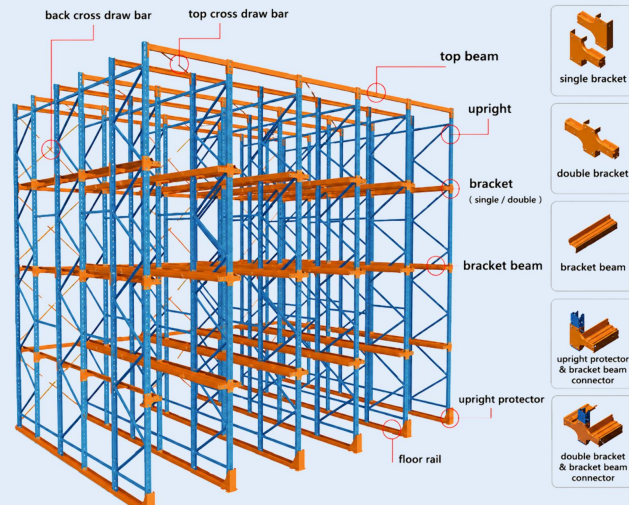

High-strength Beam & Upright

- ✓ Precision-rolled steel
- ✓ Excellent load-bearing performance
- ✓ Standardized punching for easy adjustment
- ✓ Smooth, corrosion-resistant surface

DRIVE-IN RACKING

Product overview

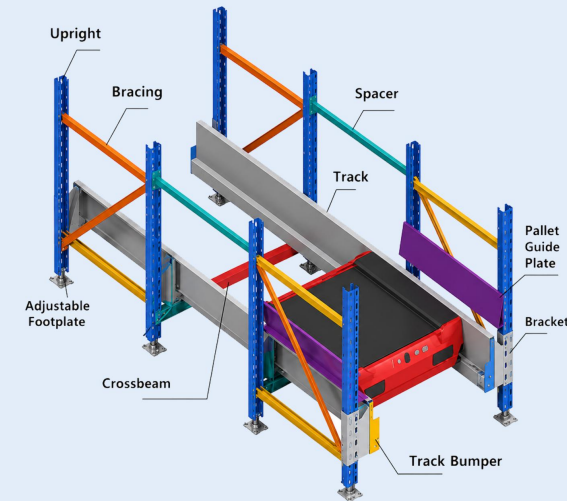

Also called drive through racking, with palletized access mode, these racks occupied very small space, but supply the most storage capacity. Drive in racks consist of continuous operating roadways, with only one main channel to load and replenish goods, operate with the counter balanced forklift or reach fork lift trucks driving through the channels. These racks follow the 'first in, last out' operating principle, and also 'first in, first out', the goods being loaded from one side and taken from the other side. These racks are suitable for the products with large quantity but few varieties, widely used in cold stores, dairy industry, drinks, foods and tobacco industry.

RADIO SHUTTLE RACKING

PRODUCT OVERVIEW

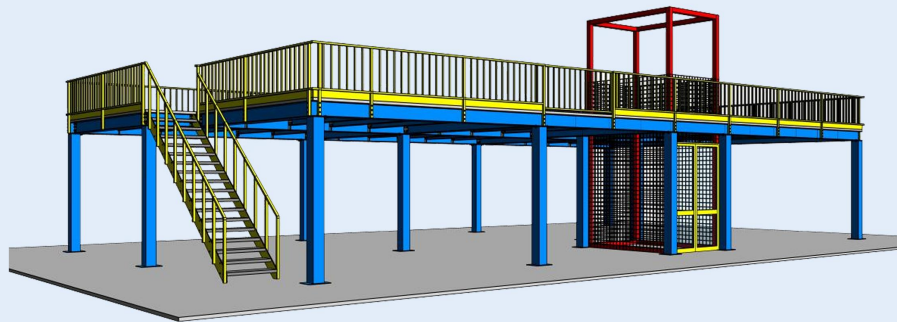

The pallet shuttle car which is used in drive in racking, has advanced performance and reliable technology, greatly improve the user's operation efficiency of logistics. The pallet storage system of the pallet shuttle including the pallet racking, battery driven pallet shuttle and fork lift truck. The pallet shuttle is in the orbit, can running against the pallet to put the goods in or out of the rack.

MEZZANINE FLOOR

Product overview

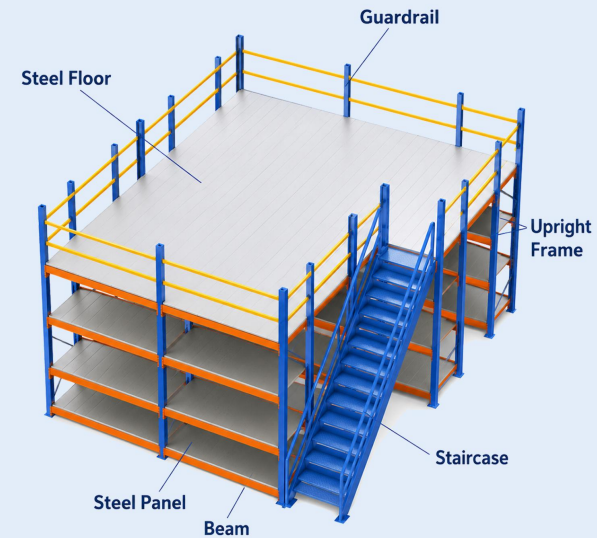

Also named steel platform/steel structures: Use heavy duty rectangular tube as support, adopts special steel floor, mezzanine is freely to design to be multilayer (generally two-layer or three-layer), equipped with stairs and lift etc. Suitable for high warehouse, small items, manual operation and large quantity's storage.

MEZZANINE RACKING

PRODUCT OVERVIEW

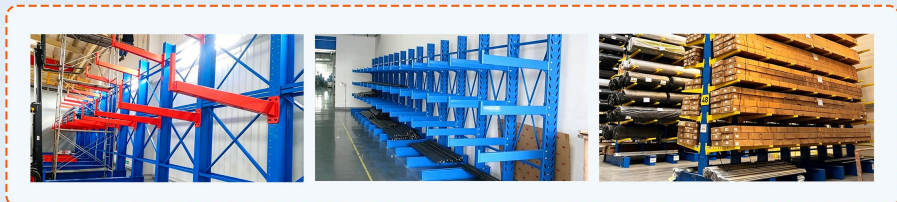

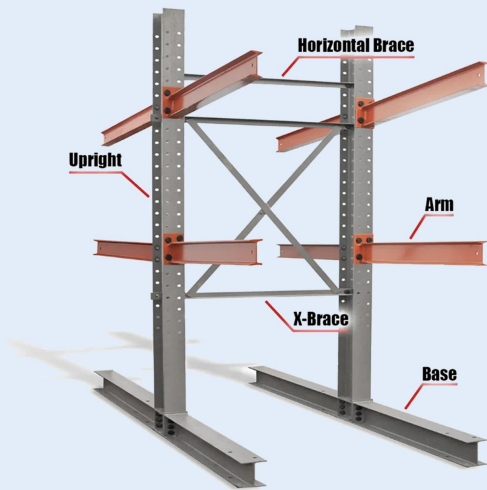

Compact structure rack, the special economic advantage of mezzanine racks is less investment. It can make full use of the space and multi-functional conversion, heavy load combined with light load, being suitable for high warehouse, light goods, large amount of goods fetched by human. It can improve the warehouse space utilization rate. This system is widely used in the field of auto parts, auto 4s store light industry, electronics and other industries.

CANTILEVER RACKING

PRODUCT OVERVIEW

Cantilever racking is used to store long materials, such as sectional materials, tubular products, cables and so on. The upright uses the H-shaped steel or cold rolled steel, and the cantilevers use the square tube, cold rolled steel or H-shaped steel, the base also use the H-shaped steel or cold rolled steel. The upright is connected with the cantilevers by bolting or plug-in type. The products can be stored by the forklift, travelling crane or manual work. The racks usual within 2.5m high (if use the forklift, can be 6m high), the length of arms under 1.5m, one side arm can load within 1000kgs, this kind of racks mainly used in machinery manufacturing industry and building materials market.

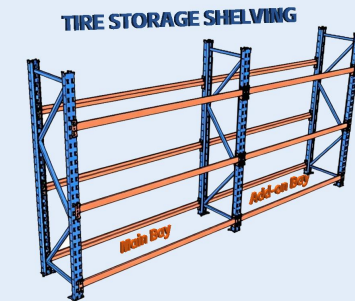

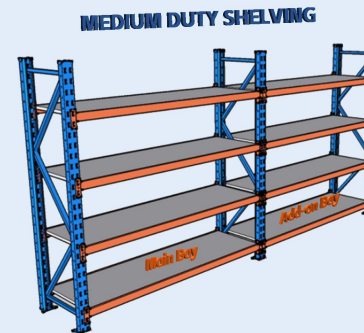

MEDIUM DUTY SHELVING

PRODUCT OVERVIEW

Medium-duty shelving belong to shelves, it's distinguished and named according to the loading capacity, between light and heavy racking. Generally could load 150-600kg per level.

We also customize shelves, tire racks, and car parts racks according to customer needs.

OUR ADVANTAGES

We combine engineer-driven design, advanced technology, and full-process support to deliver safe, efficient, and customized racking & mezzanine solutions for your business.

PROFESSIONAL TEAM
Experienced engineers & project specialists

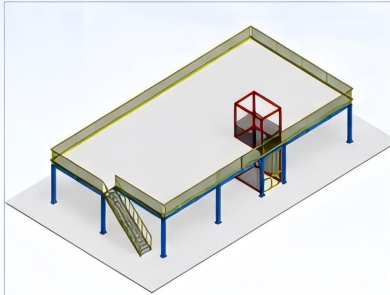

ENGINEERING EXCELLENCE
precision design meets international standards

SAFE & RELIABLE
Quality materials and strict quality control

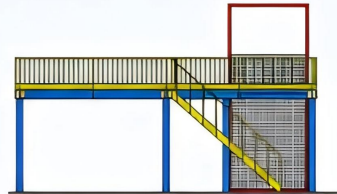

CUSTOMER FOCUS
Fast response, flexible solutions, long-term value

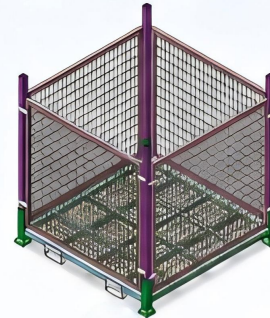

CUSTOMIZED DESIGN

Tailored mezzanine and racking solutions to maximize your space and meet your business requirements.

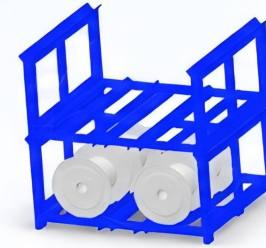

STRUCTURAL ENGINEERING

Advanced structural design ensures stability, safety, and compliance with relevant codes and standards.

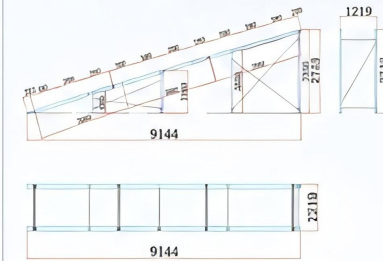

INNOVATIVE SOLUTIONS

From unique lifting cages to special storage systems, we deliver practical solutions for complex challenges.

3D MODELING & BIM

3D modeling & BIM technology help you visualize the solution early and reduce project uncertainty.

DETAILED DOCUMENTATION

Complete set of drawings and technical documentation ensures smooth production and installation.

END-TO-END SUPPORT

From consultation, design, manufacturing to installation guidance and after-sales service, we are with you every step of the way.

OUR SERVICE

Omni-Racking

For years, we have been dedicated to our core business, focusing on the production, manufacturing, and innovative R&D of shelving products. We have assembled a team of seasoned experts in the global logistics sector and top talents within the industry. With premium products, robust production and supply capabilities, and specialized technical support, we serve customers worldwide.

DEDICATED TO CUSTOMER SERVICE

Integrator: All-round strategic partner

Initial plan quotation, business negotiation; mid-term on-site survey, structural review; later on-site installation, inspection, and acceptance. Omni-Racking can provide full-coverage services, escort from the successful bidding of the project to the implementation, and supply high-quality and reliable services for all the procedures .

Distributor: All kinds of high-quality racking manufacturer

We promise one-to-one business specialist docking, domestic and overseas technical team support and sharing, product quality controllable and verifiable, in-time order tracking, and can provide exclusive brand customized marks and logos. Over the years, our original intention of high quality has never changed. Omni-Racking is your reliable partner and will always be a strong backing.

End user: one-stop solution expert

With us, you will experience face-to-face communication with the on-site investigation before the quotation, review of warehousing and logistics planning plan by the expert group before countersign, quality control of pre-production quality inspection and proofing accuracy, and supervision of project management before installation, and self-inspection of products quality assurance before acceptance. Omni-Racking firmly believes that service comes first and has all the capabilities to solve warehousing problems.
