Product Introduction

COMPANY PROFILE & SUPPORTING EQUIPMENT INTRODUCTION

Company Profile

We are a professional manufacturer dedicated to the R&D, production and customization of storage shelving systems. With self-owned production workshops, mature manufacturing technology and strict quality control standards, we independently design and produce a full range of heavy-duty, medium-duty and light-duty pallet racking, beam shelving and customized storage solutions.

Beyond independent shelving manufacturing, we have established long-term strategic cooperation with vetted high-quality supporting equipment suppliers in the industry. We integrate premium material handling and warehouse supporting facilities that are perfectly matched with our shelving systems.

We focus on delivering one-stop warehouse overall solution with cost-effectiveness, structural compatibility and operational efficiency. All supporting equipment is strictly screened in terms of quality, specification compatibility and cost performance, ensuring seamless matching with our shelving products, simplifying customer procurement procedures, shortening project delivery cycles, and optimizing overall warehouse layout and storage efficiency.

Adhering to the principle of quality-oriented, customer-first and value-for-money, we provide global clients with integrated services including product design, scheme optimization, manufacturing, supporting equipment matching and overall warehouse layout planning.

Supporting Warehouse & Material Handling Equipment Introduction

To form a complete and coordinated warehouse storage system matching our shelving products, we supply a full range of compatible supporting material handling and warehouse auxiliary equipment:

Plastic Pallets & Plastic Storage Bins

Durable, high load-bearing, anti-slip and corrosion-resistant; perfectly sized for matching with beam racking and pallet racking, ideal for unitized goods storage and turnover.

Wire Mesh Decking for Racking

Custom-made mesh decking specially designed for beam shelving systems, with strong load capacity, breathable structure and safe laying; effectively improve shelf safety and goods placement stability.

Lifting Platforms & Warehouse Handling Equipment

Stable structure, safe operation and high adaptability; perfectly matched for warehouse goods stacking, loading and unloading, and daily material handling work.

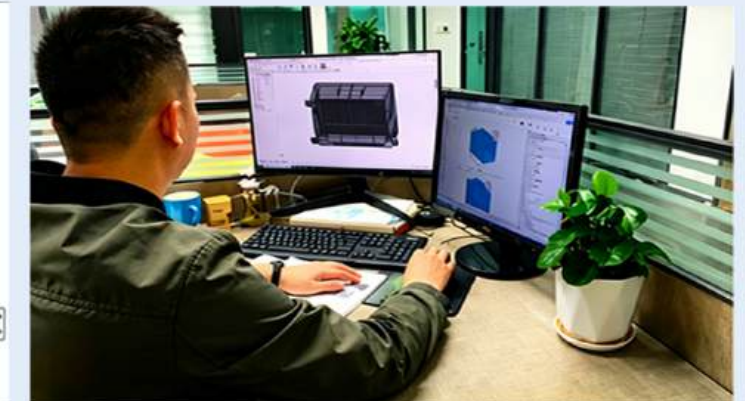

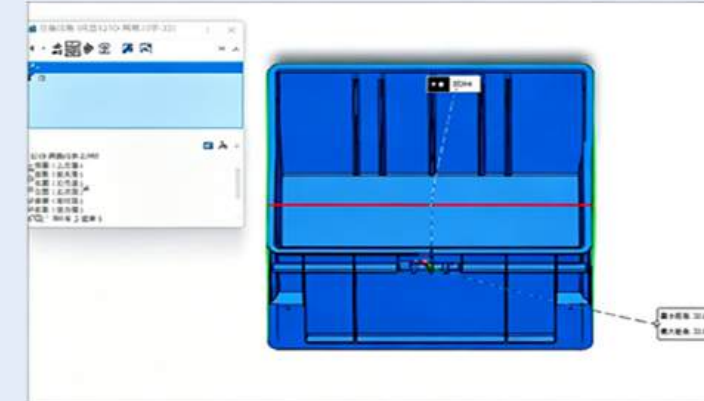

All supporting equipment features standardized dimensions, excellent compatibility with our shelving systems, reliable quality and ultra cost-performance. We support integrated selection and customized configuration, helping customers realize one-stop procurement and build an efficient, standardized and integrated warehouse storage system.

Certifications and Capabilities

Patents

Design and R&D Capabilities

We have solid plastic product R&D and design strengths. We excel in structure design, material matching and scheme customization, capable of fast developing high-quality plastic items tailored to diverse usage scenarios and client needs.

Product Quality Inspection

We implement strict quality inspection standards for all products. Comprehensive tests are carried out on raw materials, finished product appearance, dimensional accuracy, durability and safety performance. We conduct full-process quality control to eliminate defects effectively, ensuring all goods comply with industry specifications and meet reliable quality requirements.

Product Packaging and Transportation

We provide professional product packaging solutions. We adopt sturdy and shockproof packaging materials to prevent scratches, damage and deformation during transit. Meanwhile, we arrange safe and efficient shipping arrangements, ensuring goods arrive intact and on time at destinations worldwide.

Product Introduction

Stack and hang bins

Stack and hang bins are versatile storage solutions designed for efficient organization and management of small parts, tools, and supplies in various settings such as warehouses, workshops, retail stores, and even homes. These plastic stack and hang bins offer a convenient way to store items while keeping them easily accessible and well-organized.

Features:

1. Made of high strength polypropylene with re-inforced structure.

2. Bins can be interlocked side by side.

3. Stackable with riser rods or hangable on the louvered panel.

4. Compatible with wire shelving and racking system.

OMN001

External Dimensions:	W88×D130×H55mm
Packing Dimensions:	453×148×430mm

Plastic Pallet

Our 100% HDPE plastic pallets are durable, eco-friendly and moisture-proof, free from rust, rot and deformation. We supply two main types: solid all-plastic pallets and reinforced pallets with steel tubes inside. The quantity of embedded steel tubes can be fully customized according to clients' load-bearing and usage demands. Featuring high toughness, easy cleaning and long service life, they are widely used for warehouse storage, logistics stacking and cargo transportation.

(*This product requires specific details regarding dynamic load, static load, and rack load capacity to provide customers with accurate information.)

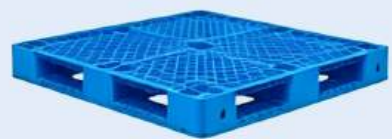

9 feet pallets series

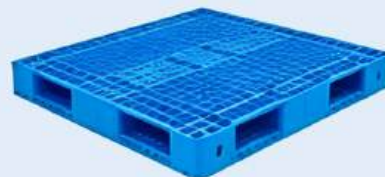

Flat Surface pallets series

3 runners pallets series

6 runners pallets series

Double sides pallets series

Flat Surface 3 runnallets series

9 feet blow molded pallets series

Double sides blow molded pallets

Spill Control pallets series

Features:

1. Waterproof, anti-corrosion and rust-proof, long service life.

2. High bearing capacity, sturdy structure, not easy to deform.

3. Lightweight, easy to clean and convenient for handling.

4. Eco-friendly and recyclable, cost-effective for repeated use.

Steel Pallet

Our steel pallets are made of high-quality heavy-duty steel, featuring firm welding and stable overall structure. They are available in various sizes and load capacities, widely applied in warehouse stacking, industrial storage and heavy cargo logistics. Custom specifications are also acceptable to meet different practical usage needs.

Features:

1. Super high load-bearing capacity, ideal for heavy goods storage.

2. Solid and durable, anti-impact, not easy to bend or damage.

3. High temperature resistant, fireproof and easy to clean.

4. Good stability, suitable for forklift operation and high-layer stacking.

5. Long service life, low maintenance cost and high practicality.

Wire Mesh Decking

Our wire mesh decking is a durable storage accessory for pallet racks, made of high-quality steel wire with anti-rust treatment. It is widely used in warehouses for placing pallets and goods, ensuring safe and efficient storage.

Features:

1.High load-bearing and sturdy

2.Anti-rust and durable

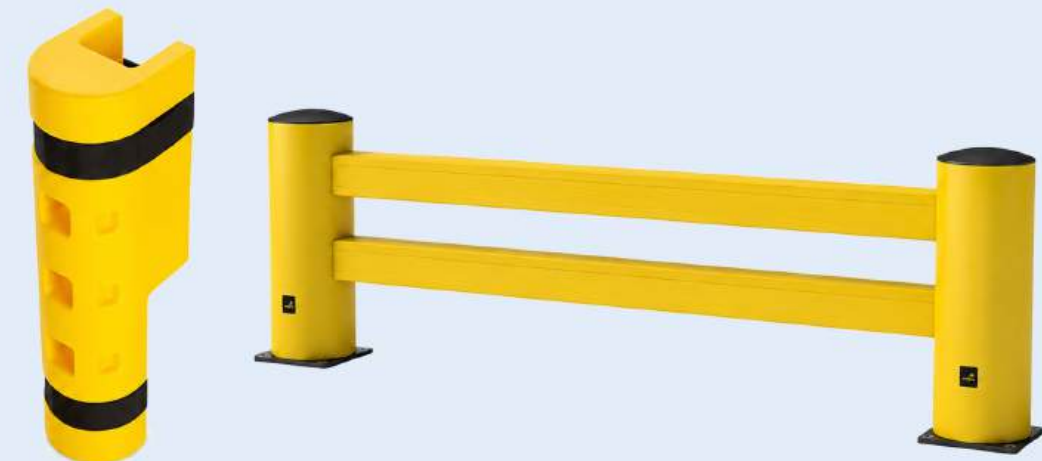

3.Good ventilation and easy to check

4.Easy to install and compatible

Polymer Anti-Collision Guardrail Corner Protectors

Made of high-quality polymer material, these anti-collision guardrails and corner protectors are widely used in warehouses, workshops and parking lots. They effectively buffer impact, protect walls, pillars and equipment from collision damage.

Features:

1.Tough and shock-resistant, excellent anti-collision effect

2.Waterproof, anti-corrosion and never rust

3.Wear-resistant, long service life

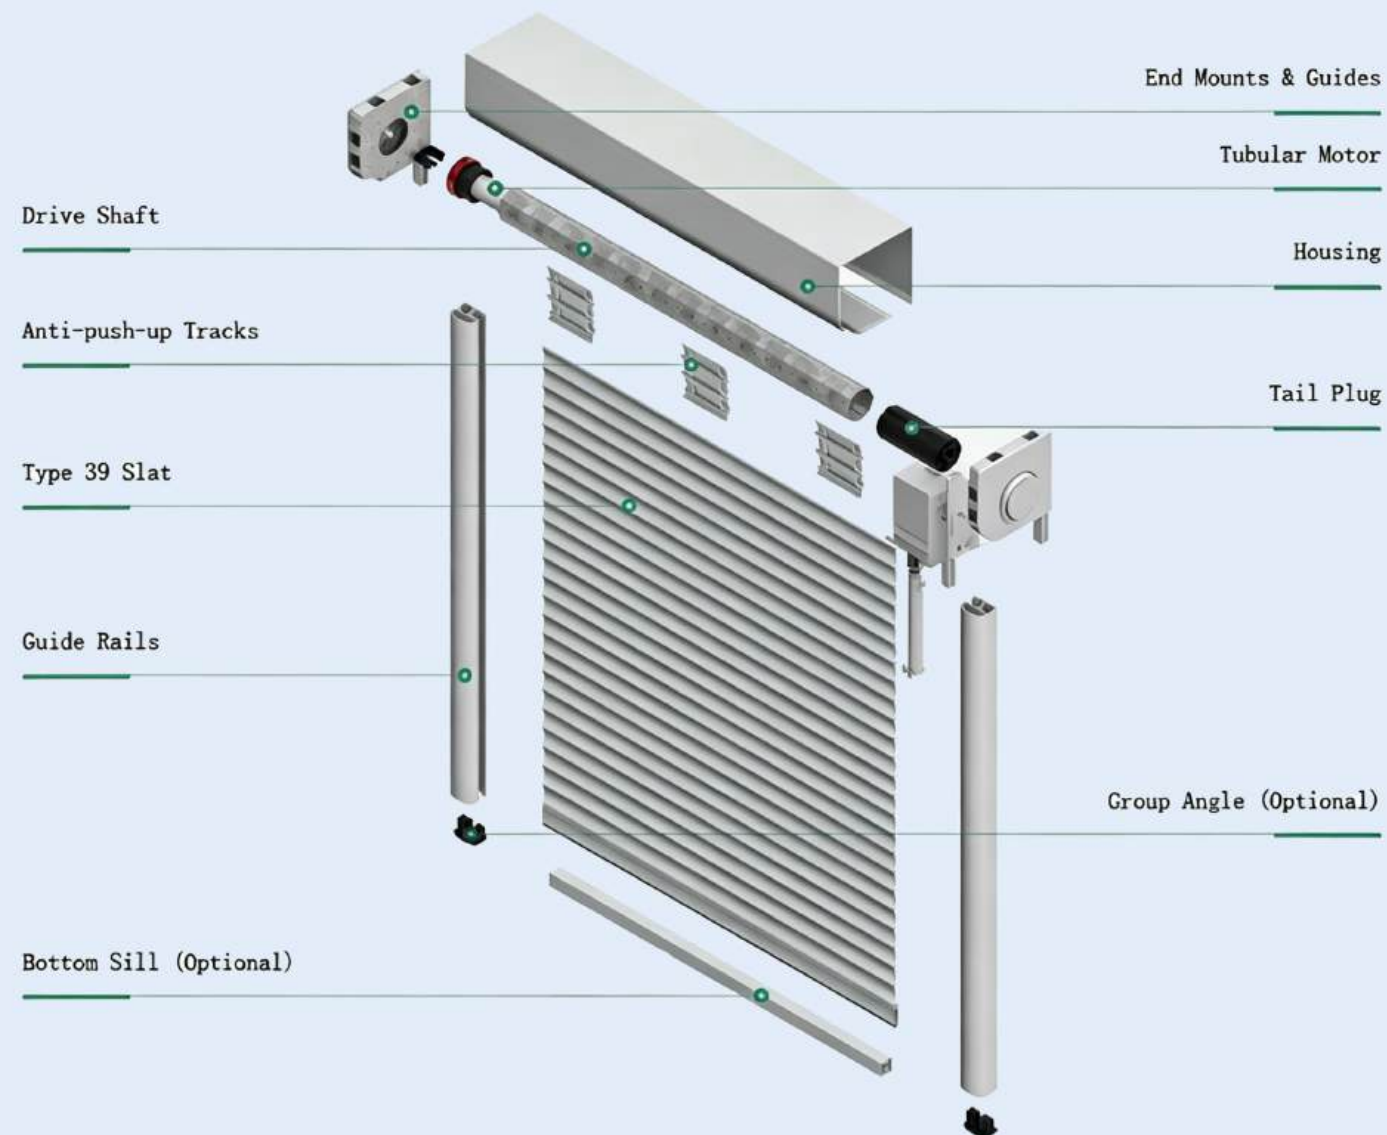

4.Light weight, easy installation and firm fixation

5.Eco-friendly material, stable performance

Lifting Platform and Roller Shutter

For mezzanine floor & mezzanine racking system

We supply reliable lifting platforms and electric roller shutters. The lifting platform enables safe vertical cargo transportation with stable lifting performance. The electric roller shutter features smooth opening and closing, widely used for factory, warehouse and workshop access control.

Features:

1.Strong load capacity and solid structure

2.Stable operation, safe and easy to use

3.Energy-saving and space-saving design

4.Simple installation and wide application

5.Rust-proof, wear-resistant and long service life
